Emergency and Safety Equipment

Unit 3 IAC3306 Cabin Crew Management

Safety is the practice and procedures for preventing injury and damage.

Security is the prevention of crime and unlawful acts.

Safety

- Performing safety duty to turbulence, firefighting, emergency landing, and decompression.
- Managing safe cabin environment.
- Operating of safety equipment and safety

system.

Security

- Performing security check for suspicious items in the cabin.
- Reporting any suspicious persons who have
 strange behaviors and can be the threats to
 passengers and crew.
- Confiscating dangerous goods form passengers who bring them in the cabin.

What is the best prevention of aircraft accident ?

Source: https://twitter.com/bangkok_airways/

The best safety device in any aircraft is a well-trained crew.

1.Initial training

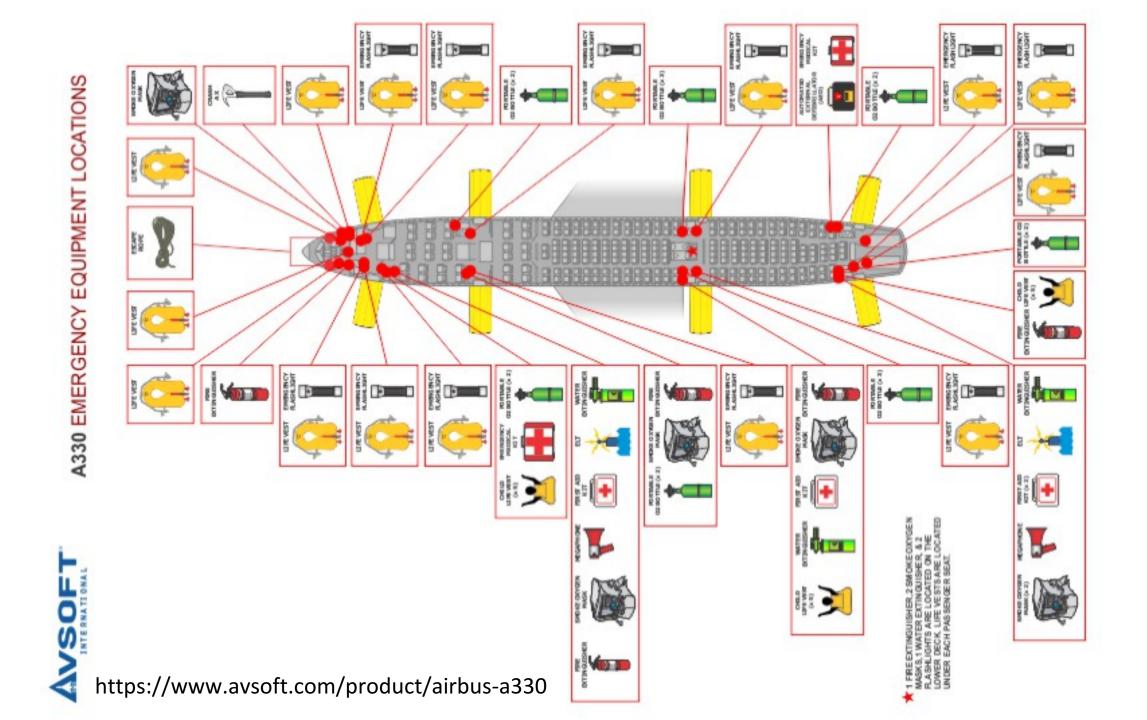

2.Recurrent

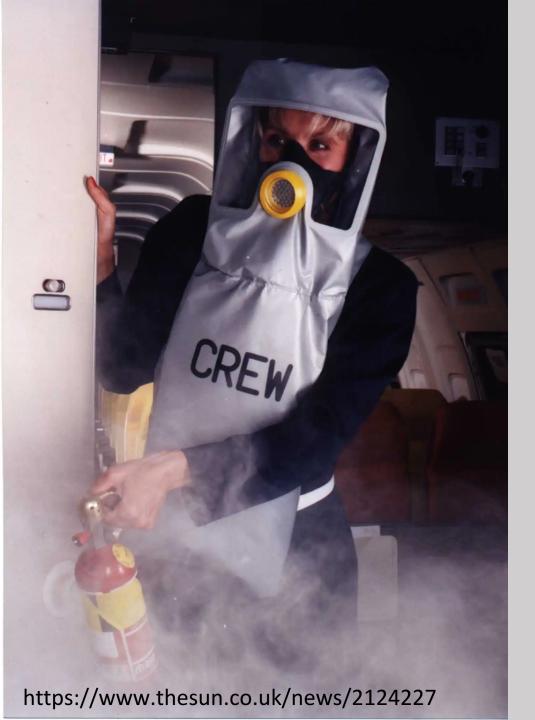

1.Initial training

- Cabin configuration
- Cabin layout
- Evacuation slide
- Safety and Emergency Equipment
 - Normal and abnormal

emergency procedure

2. Recurrent training

Exit

- Evacuation slide
- Safety and Emergency
 - Equipment
- Normal and abnormal
 - emergency procedure
 - Update and review

Exercise 1	Safety and Emergency Training
1.	What is a safety and security training for new cabin crew? Initial training
2.	What is a safety and security training for cabin crew in every year? Recurrent training
3.	What kind of safety and security training with the review of recent airplane's incidents and accidents?
4.	What issues are included in the training about exit? Type, number, location, and operation
5.	What issues are included in the training about safety and emergency equipment?

Emergency Procedure 2.1 Fire Fighting 2.2 Landing 2.3 Ditching 2.4 Decompression 2.5 Brace Command 2.6 Evacuation

Safety Equipment

1.1. Location
 1.2. Number
 1.3. Readiness

Emergency Equipment

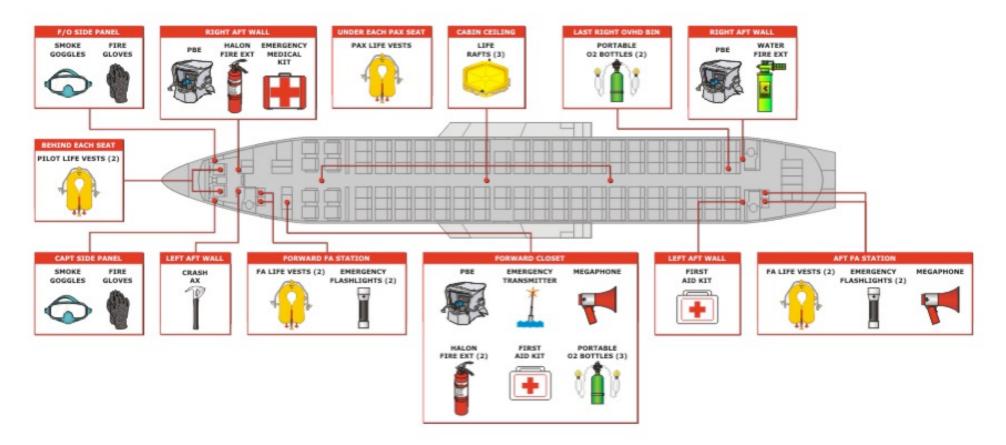

a) Oxygen Equipment
b) Firefighting Equipment
c) Survival Equipment
d) Safety Equipment
e) First Aid Equipment

Emergency Equipment Location

B737-700 EMERGENCY EQUIPMENT LOCATIONS

Safety Equipment

Oxygen Equipment

 First aid equipment

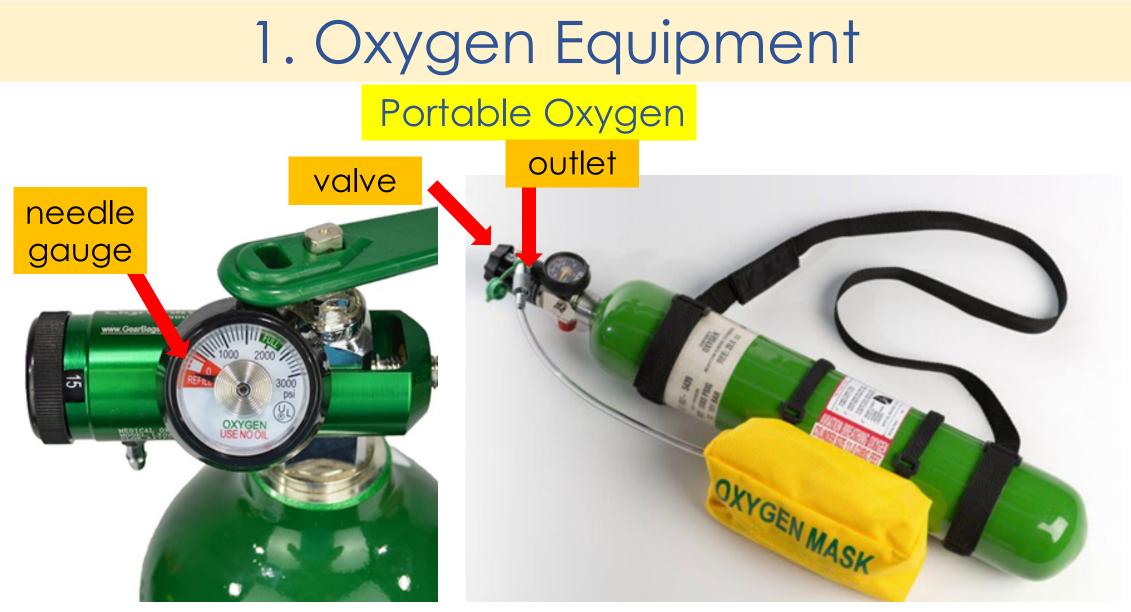

Oxygen Gauge

Oxygen Bottle/Cylinder

Serviceability – Pressure gauge is in the red band

Description – Follow-up duty and first aid

Instruction –

- 1. Plug mask into outlet.
- 2. Open valve fully, then half turn.
- 3. Check flow of oxygen mask.

2. Firefighting Equipment

Fire Extinguisher

Halon 1.5 kg

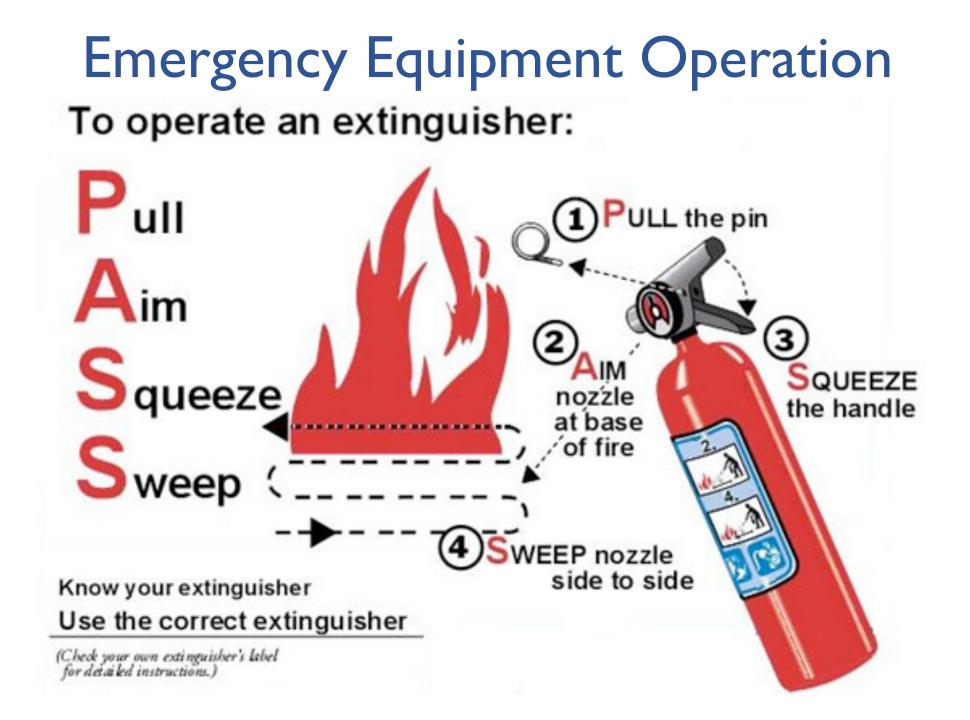

Serviceability – Safety pin/seal not teared - Pressure gauge is in green band

Instruction –

- 1. Pull the pin/seal from handle.
- 2. Aim at base of fire.
- 3. Squeeze handle.
- 4. Sweep side by side, Use short bursts or continuously.

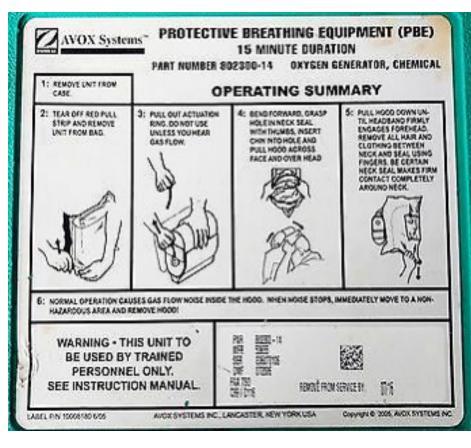

Firefighting Equipment

Protective Breathing Equipment - PBE

Serviceability – Foil pack vacuum seal is intact - Expiry date Description – Protect wearer's respiratory

Instruction –

- 1. Pull it out and shake it.
- 2. Put hand through the neck seal
- 3. Widen neck seal with hands.

https://www.johanpercherin.info/

Serviceability – Foil pack vacuum seal is intact Description – Protect wearer's respiratory

Instruction –

5. Put mask over mouth and nose.

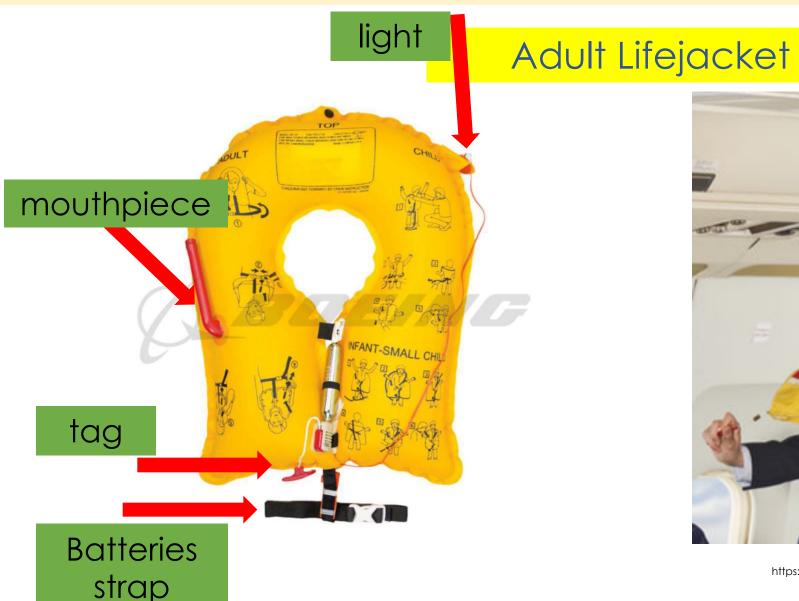

6. Pull neck seal to protect collar and shoulder area.

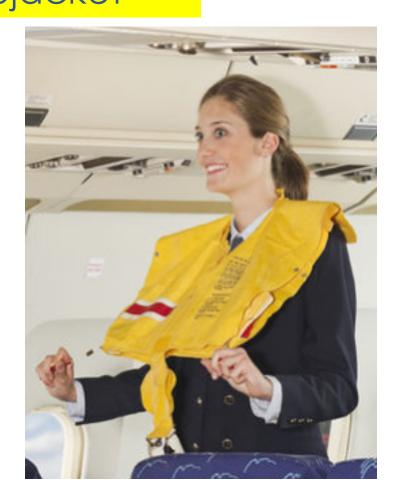

7. Pull strap forward to activate O2.

8. Pull strap backward to secure the mask.

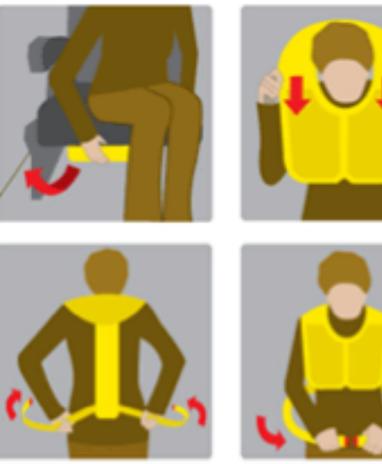

Exercise 2	Oxygen Equipment, Firefighting Equipment
1.	What is a serviceability of a portable oxygen? Pressure gauge is in the red band
2.	What is a portable oxygen used for? Follow-up duty and first aid
3.	What is a serviceability of a fire extinguisher? Red plastic disc is in place on the rear of the handle, ring is intact
4.	What are instructions of using a fire extinguisher? Pull, aim, squeeze, sweep
5.	What is PBE for? To protect wearer's respiratory systems and eyes when fighting in-flight fire.

Survival Equipment

https://www.pinterest.com/

Serviceability – Present

Description – Yellow in color

Instruction –

- 1. Pass over head.
- 2. Pass tape around waist and clip at front
- 3. Inflate by pulling red tags on jacket.
- 4. Top up by oral inflation using mouthpiece.
- 5. Whistle to attract attention.
- 6. Salt water activated light.

Survival Equipment Instruction –

Infant Lifejacket

- 1. Distribute by cabin crew.
- 2. Demonstrate by cabin

crew.

3. Cabin crew advise

passengers to use in the

emergency situation

(Ditching)

https://www.switlik.com/aviation/airlines/infant

Serviceability – Present

Description – Yellow in color

Instruction –

- 1. Place infant's arms through armholes.
- 2. Clip buckles at back and tighten straps.

Survival Equipment

http://www.kaigaibussan.jp/products/honeywell

http://www.kaigaibussan.jp/

Serviceability – Present

Description – At designates locations

Instruction –

- 1. Retrieve beacons from the aircraft.
- 2. Erect antenna.
- 3. Throw the beacon into water.
- Put lower end of beacon in plastic bag fill with impure water and keep it in a vertical position.

Safety Equipment

Seat Belt

https://www.huffingtonpost.ca

Seat Belt

https://www.ems1.com/ems-products Shoulder Harness

Serviceability – Present Description – lap belt or shoulder harness

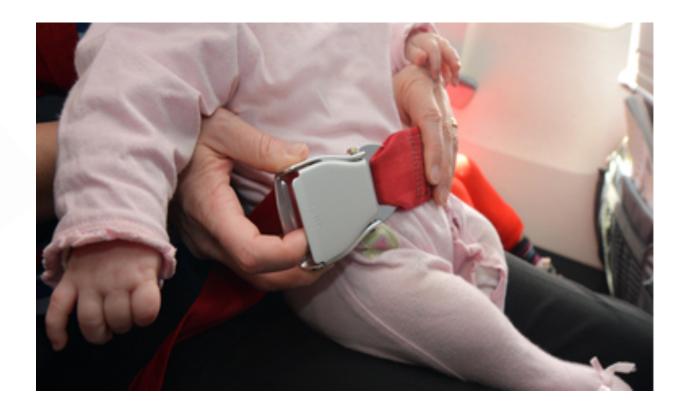

Instruction -

- 1. Fit lab belt firmly across the waist.
- 2. Fit shoulder harness.
- 3. Lift and release clasp on the buckle.

Safety Equipment

Infant Extension Seat Belt

https://www.pregnancybirthbaby.org.au/

Extension Belt

Exercise 3	Survival Equipment, Safety Equipment
1.	What is a serviceability of an adult lifejacket? present
2.	Where is a location of an adult life jacket in Economy Class? Under the passenger seat.
3.	When a life jacket is required to be inflated? While exiting the aircraft
4.	Where is the location of survival beacon? At the designated location or with life rafts of some aircraft types
5.	What is a survival beacon for? Transmit GPS or non-GPS signal to satellite, indicate location

First Aid Equipment

First Aid Kits

Physician's Kits

First Aid Kits

Serviceability – Present

Description – General first aid equipment and medication (dayto-day use).

https://www.sja.org.uk/first-aid-supplies

Medical / Physician's Kits

Serviceability – Present

Description – Purser or doctors or physician practitioner are permitted to use the kits.

https://www.sja.org.uk/first-aid-supplies

First Aid Equipment

Heart-start Defibrillator

https://www.nucotraining.com/automated-externaldefibrillators-on-aircraft-2/ https://marketresearch.biz/report/externaldefibrillator-market/

https://marketresearch.biz

Serviceability – Present

Description – Heart-start defibrillator for unconscious, no breathing and no pulse.

Instruction – 1. Press green button.

2. Follow voice prompts.

3. Apply pads to bare chest.

4. Plug is pad connector.

5. Press shock button if instructed.

Emergency and Safety Equipment Check Procedure

The Purser calls cabin crew to be at their stations by phrase "Cabin crew safety and emergency check." on PA when cabin crew are ready in the passenger cabin.

Safety Equipment Checklist

Cabin Crew Preflight Emergency and Safety Equipment Checklist

Station 1L

- Items are needed to be checked before each takeoff.

- Any irregularities must be reported to the Purser.

Location	Quantity	Description	Check
L1	1	Cabin crew preflight checklist	
	2	Cabin Emergency and Safety Equipment Checklist	
	1	Life Vest, red	Expire date
	1	Flashlight	Light intensity
	1	Oxygen bottle, with mask	Min press 1500 PSI, gauge in red sector
	1	Halon or BCF fire extinguisher	Sealed, press indicator in green sector
	1	PBE (Smoke hood)	Sealed

Note: All emergency doors and slide pressure will be checked.

Adapted from: Thai Airways. (2010). Cabin Attendant Emergency Procedure.

Bangkok: Thai Airways.

Emergency and Safety Equipment Check Procedure

stations one by one to the Purser on conference line interphone by phrase "Station (L1), emergency and safety equipment check is

completed."

Exercise 4	Safety Equipment, First Aid Equipment
1.	How to release the seat belt? Lift the clasp of flat on the buckle
2.	Where is an extension seat belt? Cabin crew distribute to passenger when he ask for .
3.	Who can use the first aid kits? Cabin crew and others
4.	Who can use the physician/ Medical's kits? Purser, doctors
5.	What is a heart-start defibrillator for? Unconscious, no breathing, no pulse
6.	What is a cabin crew report of emergency and safety equipment check?
