## 7. Verification of students' achievements

Verification Method(s)	Verification Result(s)
<p><b>7.1 Quantitative Assessment Standards “Validity”</b>                      Assessment of a student's knowledge and skills usually results in an empirical 'indicant' i.e. a number (mark) or a grade that represents the knowledge and skills being assessed. Validity refers to the extent to which the indicant measures what it claims to measure. Also, designing assessments is critical which allow students to demonstrate their achievement of the learning outcomes.</p>	- Students' achievements can be properly measured by using this method.
<p><b>7.2 Project</b>                      Projects are an extended piece of work involving inquiry based activities. Some project may be small or large, undertaken by individuals or in groups and have outcomes such as a report, design, art work, working product. In addition, describing the task and its requirements clearly in writing. Allowing time in class for discussion and clarification is also needed. It must provide clear criteria for assessment when the task is set.</p>	- Students' achievements can be properly measured by using this method.
<p><b>7.3 Presentation</b>                      Presentations are usually made orally to a class on a prepared topic and may include the use of presentation aids such as PowerPoint, handouts or audiovisuals. This assessment is undertaken individually or as a group. Presentations take different forms such as role plays, facilitating group activities, debating, presenting a product, question and answer time, and formal speeches.</p>	- Students' achievements can be properly measured by using this method.
